**Ministry of Environment and Forests****RELOCATION OF 376 FAMILIES AND 3 FOREST VILLAGES FROM GIR LION RESERVES**

16:40 IST

Preparatory measures for relocation including adequate publicity in local language have been undertaken for relocation of 376 families and 3 forest villages from Gir Lion Reserve. This has been informed by the Government of Gujarat to the Ministry. The Government of Gujarat has submitted a proposal titled 'A plan for consolidating long term conservation of Asiatic lions (Panthera leo persica) at the Greater Gir region including the Gir Protected Area System'. The proposal also includes a component for relocation of 376 families and 3 forest villages from Gir.

The Planning Commission has 'in principle' approved an amount of Rs.262.36 crores for a period of five years for this project proposal and suggested that financial assistance under the project may be met out of the ongoing scheme of 'Integrated Development of Wildlife Habitats'. As the fund allocation under the scheme 'Integrated Development of Wildlife Habitats' is meager, the project for lion could not be accommodated within this scheme.

This information was given by the Minister of State for Environment and Forests (independent charge) Shri Jairam Ramesh in a written reply to a question by Shri Natuji Halaji Thakor in Rajya Sabha today.
